

## Styling vintage globes

© INSTAGRAM @THREESONSFARMHOUSE

### WORKING WORLD

Use globes to style up a desk space like interiors Instagrammer Laura from @threesonsfarmhouse has in her home office. The aged wood and original hardware of the vintage bench give this workspace a rustic touch, while the dark, glossy globe looks slick and contemporary in contrast. Extra storage is created using plumbing supplies and the tractor seat stool reinforces the industrial vibe.

### MONOCHROME MAPPING

Hang a moon globe from the ceiling to allow it to spin freely so that you can explore the features of the lunar landscape. I've installed my moon globe beside our vintage glass globe light fitting, which is also a 12-inch diameter. The grey hues of the moon fit into the minimalist, monochrome scheme and it is proudly displayed alongside a vintage 1970s glow-in-the-dark moon poster.

### GLOBETROTTING COLLECTION

Designer Caroline Bivens, who shares interior photos on Instagram at @c.b.\_designs, has created a map-filled space in her son's bedroom to inspire dreams of travel and exploration. A scaffold shelf above the wrought-iron bed displays a collection of vintage globes - helpful for completing that geography homework - and an aged map of South Africa hangs below, bringing a feeling of adventure to the room.
